

# RTConnect.Net SELF HELP INSTALLATION GUIDE

## Dial-Up for Windows 95/98

1. Turn on your computer
2. Click on **“Start”**
3. Click on **“Programs”**
4. Click on **“Accessories”**
5. Click on **“Communications”**
6. Click on **“Dial-Up Networking”**
7. Click on **“Make New Connection”**
8. Type **“RT Connect”** in location labeled **“Type a name for the computer you are dialing.”**
9. Select your modem type in the space labeled **“Select a device:”**

10. Click the **“Next”** button
11. Type **xxx-xxxx** in the location labeled **“Telephone Number”** Look at the table on the last page for your

Dial-Up number. Do Not Enter an Area Code.

12. Click the “Next” button

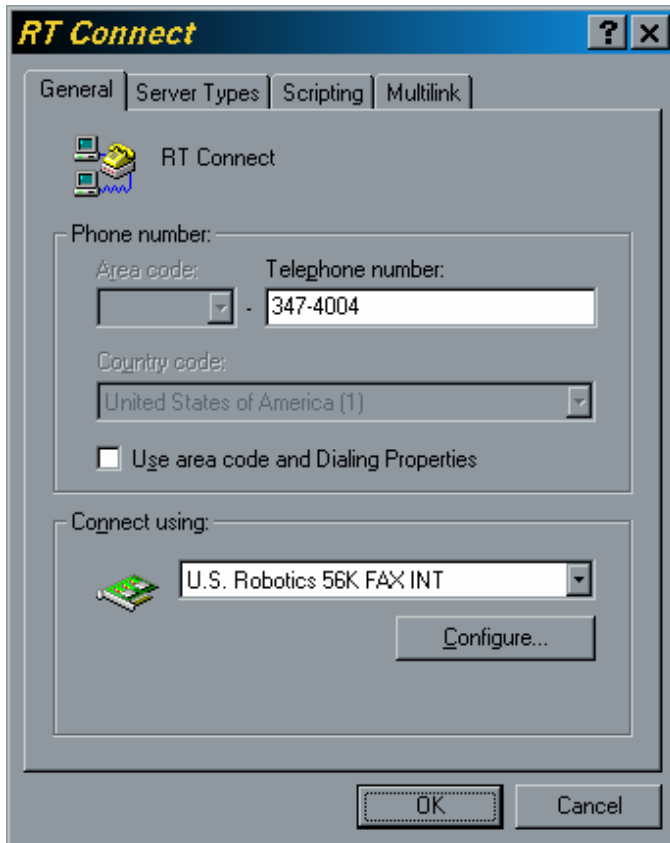

13. Click the “Finish” button

14. Right click on “RT Connect Connection”

15. Click on “Properties”

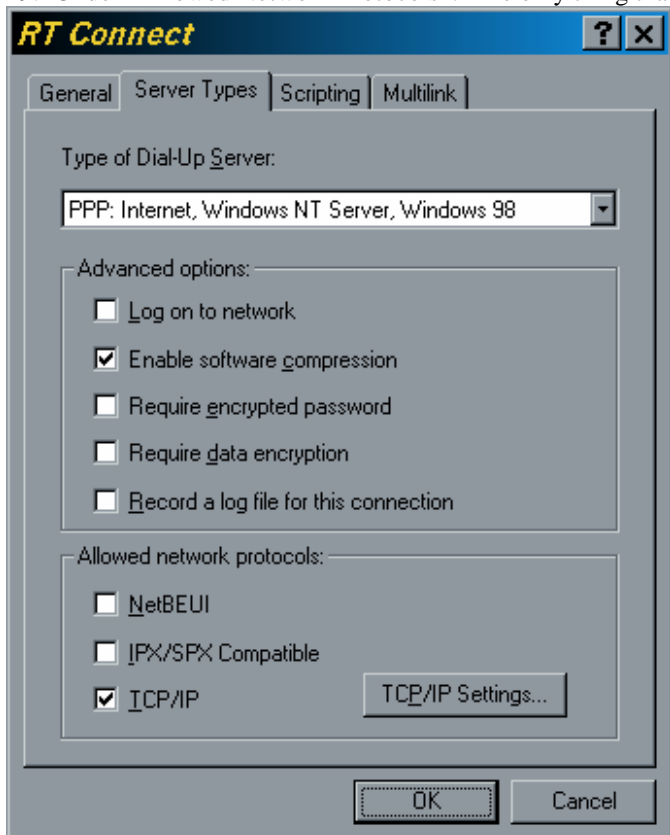

16. Uncheck “Use area code and Dialing Properties”

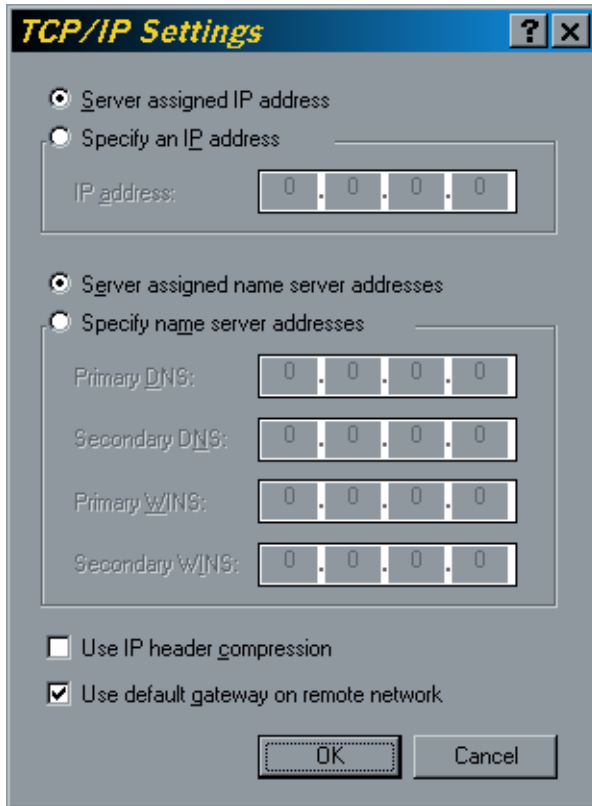

17. Click on the “**Server Types**” tab

18. Under the “Advanced Options”: The only thing that should be checked is “**Enable Software Compression**”

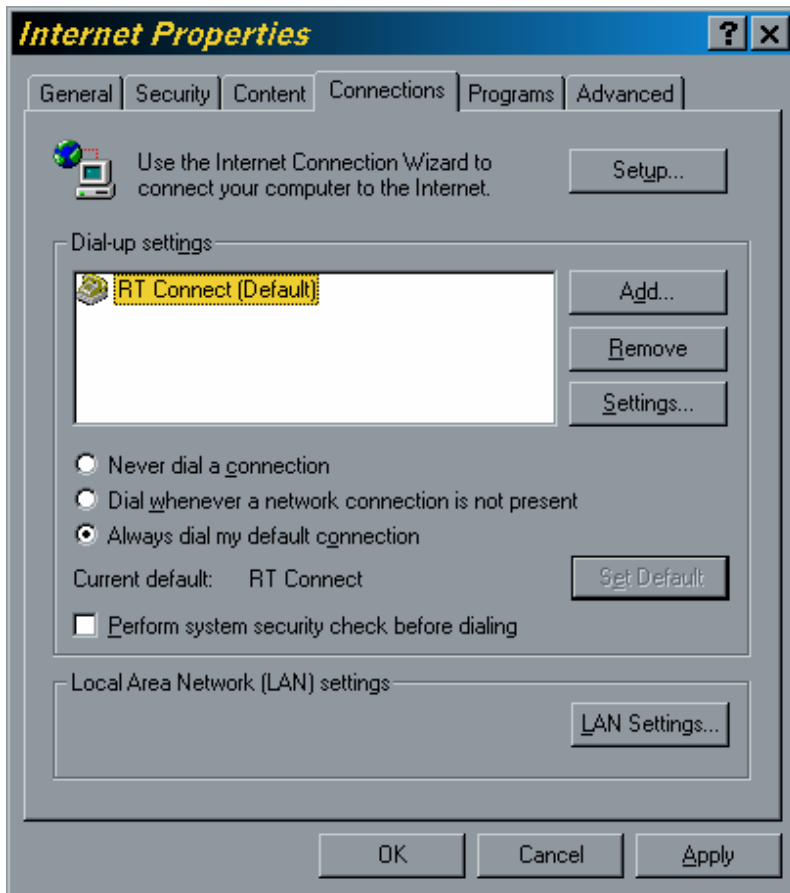

19. Under “Allowed Network Protocols”: The only thing that should be checked is “**TCP/IP**”

20. Click “TCP/IP Settings” button
21. Uncheck “Use IP header compression” – Leave everything else the way it is

22. Click on the “OK” button
23. Click on the “OK” button
24. Close the “Dial-Up Networking” window
25. Click the “Start” button
26. Click on “Settings”
27. Click on “Control Panel”
28. Double Click on “Internet Options”
29. Click on the “Connection” tab
30. Click on “Always Dial My Default Connection”
31. Click on “RT Connect” once
32. Click on the “Set Default” button

33. Click the “**OK**” button

34. Close “**Control Panel**”

35. Double click “The Internet” icon from your Desktop and happy surfing.
